Well stocked.

Volume 3, Issue 3

March 2004

We've got more stock than you can poke a stick at!!

Pardon the pun but it's true. This months newsletter will be a mini stock list to give you an overview of some of the sorts of things we carry. We are well stocked as we have been buying up since the end of January. As you would expect some supplies dwindled around Christmas but we are in top gear now.

New Oil.

We now stock the Organoil Endeavour Oil. This is the oil you need for marine applications. There are two oils and a wax. First is the Priming Oil. As the name suggests, this is oil is for getting the ball rolling on your boat and is the one to use for initial coating. Next comes the Finishing Oil. Pretty easy really. Follow the names and you can't go too far wrong. We have information sheets at Monaro Timber for you if you think this oil may be for you. Currently in stock are two litre tins but other sizes are available. Please call us if you require further info and pricing.

The stock list.

Currently we are very well stocked as I said previously. Here is a brief rundown of what's available.

Blackwood. We have several packs in store as well as full racks. All sizes from 25mm through to 50mm are catered for and as a bonus we also have 75 x 75. We haven't seen this size for awhile but managed to source some recently. Due in very soon is a pack of high feature fiddleback and birds eye Blackwood in 25mm boards. I am heading to Tassie very soon so if you are after anything in particular please let me know.

Jarrah. Prices are about to go up. We have stocks at the old prices and can source a little more in the next few weeks before we have to pay more. If you need some Jarrah buy now to beat the increase. We have good stocks of 150 x 25, 150 x 38 and 300 x 50. Other sizes are available so call us for info.

Danta. We have recently received our new shipment of 38mm. This is the size for table

tops and kitchen tops. We have 25 and 50 in stock too.

Western Red Cedar. We have fresh 50mm #2 clears. Widths range from 150 through to 300mm.

Kauri Pine. Some fantastic 25mm Kauri has arrived. Boards up to 320mm wide. Don't miss them.

Specials. We are running specials on a number of species. We have excellent American Cherry in stock at ½ normal price. Boards are 25mm thick and up to 1.8m long. Also going cheap is our 75 and 100mm thick Reg Gum. 40% off normal prices. For those of you chasing large slabs we are knocking off 20% from all slabs in stock at the moment.

Bandsaw. Need a good old machine? We have a 3 phase bandsaw which is now surplus to requirements. It's pretty big and comes with a selection of blades. Asking \$1200.00.

That's my lot for this month.

Regards *Shaun.*
