

Hot Chippies New Display Home.

The boys have no sooner finished the decking job with the Klevaklip and they are now about to complete a new display home. I won't steal their thunder by announcing the details but I will say it includes some special flooring, a new deck with Klevaklip fixing and a very special timber benchtop in the kitchen. Stay tuned for more info this project.

It's Springtime, and that means, time to build a deck!

I think we may offer the largest range of timber decking in the region. You decide but how about this for a selection. Merbau, Tallowood, Red Gum, Iron Bark, Spotted Gum, Blackbutt, Green Heart, Yellow Stringy Bark, Silver Top Ash, Karri and Jarrah. Nearly forgot Cypress. What, no treated Pine you say? If you really want it there are other suppliers who can oblige. We focus on good quality naturally durable species that don't require huge amounts of chemical to make them last outside. Sure the treated Pine is cheaper but will it really last and does it look good? Your choice, but if you are looking for good quality options drop in and check out our range. We can also assist with Natures Mark Cedar for the structure as well as kiln dried hardwoods in species such as Blackbutt, Silvertop Ash and Spotted Gum. Call or email now for the latest info or prices.

Floor Staining Workshop.

The floor staining workshop we talked about last month is happening on September 9th. Everyone is welcome to come along but please let us know numbers so we can make sure we have a few drinks and nibbles for you. If you are a floor layer this is a must attend workshop. If you are a designer or builder then it will also be worthwhile to see how you can transform a floor with colour. Best of all it's free and we will provide some food and booze!

Rose Gum Flooring Special.

We have a pack of Rose Gum going at a special price. This pack of 80 x 12 light medium feature grade will cover 25.68m² and is available for only \$46.40/m² inclusive of GST. On top of that, we will throw in two nights in our two bedroom unit in Jindabyne at no charge if you buy this pack. The unit is available after the ski season and all you have to do is call Lianne in our office to book your stay. Easy as!

New Stock.

We have had a number of new packs arrive over the past month. We had new stocks of Spotted Gum in 150 x 50 arrive and more is on order. If you want Tallowood we have 150 x 50 in that too. Just arrived today was a mixed pack of 38 and 50mm Iroko. This African timber is excellent for out door applications and is regularly used as a Teak substitute by boat builders. Also just arrived is a selection of Hoop Pine in 150 x 25 and 150 x 38. This Australian native is far superior to Radiata Pine in terms of its workability and arguably it's appearance. We also have 75 x 75 in stock which is useful for turning up legs and rails for table projects. Wide boards are getting harder to get in many species but a new pack of 225 x 25 Ash will help take care of those bookshelf projects. August also saw a lot of new packs of F27 structural material turn up in Blackbutt, Spotted Gum and Silvertop Ash. This can be used for outdoor furniture projects, structural jobs like decks and pergolas and selected boards can be used in furniture projects. Baltic Pine is a timber we haven't seen for awhile but a new pack came in a few days ago. This material is 175 x 50 and compliments the 25mm we have in stock.

Finally, there will be some price changes with certain flooring products shortly, however a number of mills are currently running specials. They are overstocked with many products. If you need flooring now is a good time to look at your options

Until next month *Shaun*
