# 3. Feature Timber

All timber is unique in individuality and character. At Ironwood Australia we specialise in unique timber loaded with personality. Our recycled timbers are full of character and charm and can add that special something to your next project.

Ironwood is Australia's leading supplier and miller of Australian hardwood recycled and reclaimed timber. Whether it be for commercial or residential applications we can mill and supply the timber that will add personality and character to your project.

A major advantage of using recycled hardwood timbers are the positive environmental effects, including conservation of old growth forests, increased carbon storage and lower greenhouse gas emissions.

Feature timbers can be used across a large range of products such as cladding, flooring, decking, stair treads, posts and beams, joinery applications, fibre place mantels or rustic seats and stools.
